

Dear Kaleidescape Customer,

Your Kaleidescape™ System will be upgraded automatically to run KEAOS 3.2, the latest version of the Kaleidescape Entertainment Appliance Operating System.

KEAOS 3.2 contains several new features: If you use the Music Server, you can now ask the System to play all of your music continuously, or you can play all of your music in a genre or by an artist of your choice. You will also notice other improvements in the on-screen user interface: you can now create a Mix Album (a list of songs that you can save and play later), and we have added Details pages for artists and genres, with biographies and descriptions. We have also made the screen saver more entertaining. Finally, if you use a Mac™ computer to access the Web Utility, you will now be able to enjoy the same ease of use as Windows users by using the friendly URL <http://my-kaleidescape.local>.

Sincerely,

The Kaleidescape Team
