

Dear Kaleidescape System Owner,

Kaleidescape announces version 3.6 of the Kaleidescape Entertainment Appliance Operating System (KEAOS). KEAOS 3.6 will be installed automatically in your System during the month of July 2008. To determine the KEAOS version running on your System, view the **System Summary** tab on the onscreen display (OSD), or view the **System Status** area on the home page of the Kaleidescape User Web Utility.

KEAOS 3.6 includes the following new features:

- **Advanced DVD and CD Playback Features**  
The Kaleidescape Experience is now available for DVDs and CDs that you do not wish to import into your Kaleidescape System. When you insert a disc into a Movie Player for direct playback, you can enjoy seeing information about the movie or album, including cover art, movie synopsis, album review, and track names. You can select “Play Movie” to start even a rental movie instantly, without trailers and advertisements.
- **Disable a Movie Player’s Imports**  
Sometimes you may not want certain Movie Players to be able to import DVDs and CDs – for example, those in a child’s bedroom or a guest stateroom on a yacht. A dealer-configured option is now available to disable imports from those Players.
- **Philips™ Pronto Controller Support**  
With KEAOS 3.6, you can use a Pronto™ TSU9600 or TSU9400 controller with your Kaleidescape System. These elegant handheld devices offer features similar to those of a larger, more expensive touch panel:
  - Rich interactive interface with touchscreen and rotary wheel inputs
  - Movie and music details displayed while browsing
  - Multi-zone control of a Kaleidescape System
  - Control of a music zone without an OSD

**Back By Popular Demand!**

Kaleidescape is pleased to announce the return of the yellow frame for highlighting selections on the OSD, replacing the blue frame introduced last year.

Sincerely,

The Kaleidescape Team
