

Dear Kaleidescape System Owner,

Kaleidescape announces version 3.7 of the Kaleidescape Entertainment Appliance Operating System (KEAOS). Sometime during the month of March 2009, KEAOS 3.7 will be installed automatically on your Kaleidescape System assuming it is connected to the Internet. To determine the KEAOS version running on your System, view the System Summary tab on the onscreen display (OSD), or view the System Status area on the Web Utility at <http://my-kaleidescape/> (or <http://my-kaleidescape.local/> on a Mac).

KEAOS 3.7 includes the following new features:

- Multi-channel Audio Over an HDMI Connection**  
 Dolby Digital and DTS multi-channel audio can now be sent over an HDMI connection. In versions prior to KEAOS 3.7, only decoded two-channel Dolby Digital audio was sent, and DTS audio was not sent at all. KEAOS 3.7 will not change the behavior of existing Movie Players, but HDMI multi-channel audio can be enabled in the Installer Web Utility at <http://my-kaleidescape/installer/components.html> (or <http://my-kaleidescape.local/installer/components.html> on a Mac).
- Play Multiple Genres or Play Multiple Artists**  
 When selecting music, you can now play multiple genres or play multiple artists. In versions prior to KEAOS 3.7, only a single genre or a single artist could be added to the Now Playing list.

Please direct questions and feedback on this announcement to [support@kaleidescape.com](mailto:support@kaleidescape.com).

Sincerely,

The Kaleidescape Team
