KEAOSupdate

v3.8

Kaleidescape announces the deployment of KEAOS 3.8, the most recent update to the Kaleidescape Entertainment Appliance Operating System. KEAOS 3.8 includes the following new features:

- **Temperature Analysis and Alerts**

KEAOS 3.8 continually analyzes the temperatures of Kaleidescape components. If a component gets too hot or too cold, a warning appears on each display instructing the owner to schedule a service call, and an automatic email alert is sent to the dealer.

- **Optional Paused Bookmarks**

When you stop a movie you can resume it at a later time in another room. This behavior is more desirable in a single-family home than in a yacht, hotel or other environment that caters to a large number of users. KEAOS 3.8 adds the configuration option to disable paused bookmarks.

KEAOS 3.8 was distributed automatically to all Kaleidescape movie servers effective March 8, 2010.
