The Kaleidescape System

Using the Remote

Programming the Remote

You can program the **Volume Up/Down** and **Mute** buttons on the Kaleidescape remote to control the volume on your TV or other device by following these steps.

1 Press and hold the **Info** and **Pause** buttons at the same time. When the indicator light at the top of the remote begins blinking, release the buttons. The indicator light stays on and the Kaleidescape remote is now in learning mode.

2 Place the teaching remote and the Kaleidescape remote on a table so that they point at each other and are approximately 6 inches (15 cm) apart.

3 For each button on the Kaleidescape remote you want to teach, repeat the steps below. Only the **Volume Up/Down** and **Mute** buttons can be taught.

- Check that the indicator light is still on. If it is off, repeat Step 1.
- Press and release the button on the Kaleidescape remote that you want to teach.
- Press the button on the teaching remote whose functionality you want to teach to the Kaleidescape remote, and hold it for two seconds.
- The indicator light on the Kaleidescape remote blinks twice to indicate success. If the indicator light blinks four times, then you must try again from step 3.

4 When finished press the **OK** button on the Kaleidescape remote.
